Subject: Fwd: Aerojet Area 40 RAP - Finalized - August 27, 2018

Hi, Chris. Would it be possible for you to bring a couple CDs of the Final FS to the CAG meeting for members that are interested? If a couple members want a hard copy of the FS, could they request that at the meeting Weds?

Also, please let us know the tech meeting schedule for Weds when you have a chance. I'm planning on driving to Sac Weds morning since I believe my topics are in the afternoon.

Thank you,
Lynn

Dear Pete,

I am cautiously hopeful that DTSC will be able to provide staff to discuss the final RAP - at a minimum the key points noted in the August 27 DTSC letter to Aerojet and the documents that are available on Envirostor. Because so many people in the community put time & effort into their review of the draft Area 40 RAP, it feels appropriate to provide feedback to the CAG now that the RAP is final.

I will be finalizing the meeting agenda Tuesday morning.

Thank you,

Janis

PS The agenda is similar to past agendas; Chris, Lynn & Daewon, & Alex are listed in their usual spots, and then Daewon will orient the CAG to OU6, now that it is moving toward the work plan. And then there is the final RAP. If any of you have an additional item for the agenda, please let me know!

Hi Janis,

The written responses provided to any community members comments/concerns before the finalization of the RAP should match those responses provided in Final RAP Appendix E. In some cases additional clarification/feedback may have been included in the Final Responsiveness Summary (RS) responses due to more available time. Nonetheless, the responses provided in advance of the Final RAP and those in the Final RAP Appendix E are equivalent, if not the exact same.

I will work on uploading Appendix E as a stand-alone document on EStor.

The Responsiveness Summary is the actual document that presents replies to the community members. DTSC is not planning to send out additional separate responses to each member other than those that have already been submitted before the Final RAP.

DTSC management is evaluating the possibility of having staff familiar with the project available at the CAG meeting. If for some reason this is not possible, then I will be more than willing to go over the Final RAP modifications at the next available opportunity (CAG meeting or before).

Sincerely,

-Pete

Hello Pete,

In regards to your email below, I have gone into Envirostor and reviewed the postings.

In the past it appeared to be DTSC policy to provide a reply to comments made during the comment period with a letter responding to those comments. For example, the CAG made a statement at the June 20 meeting in Folsom and provided comments on the Area 40 RAP before the end of the comment period on July 20. I do see that our comments have

been responded to in Appendix E, but Appendix E is attached to the final RAP (Final_RAP_Area40_Aerojet wo FG.pdf). The document is 15.7MB, which can be a large document for community members to download onto their computers.

Is DTSC planning to send out replies to community members and other entities who made comments during the comment period?

And in cases where you did send out comments (for example, to Rob Burness' comments at the Folsom hearing), do the comments you sent Rob match the comments made on the same subject within Appendix E?

As I stated last week, it would be valuable to have a free-standing Appendix E posted to Envirostor, as that would provide the community with a less unwieldy document.

Thank you Pete,

Janis

Hi All,

I wanted to notify you that the Area 40 RAP was finalized on August

27th. Final copies of the documents (RAP and EIR/EIS Addendum) are

available at the same repositories and also available online on both the Envirostor and Geotracker websites. Responses to the public comments and questions are presented in the Responsiveness Summary, an

Appendix to the RAP. DTSC is preparing a public notice for the papers

identifying this milestone and completion. Call or write if you have

questions. Thank you.
